Detailed Project Description and Justification:

The existing 4' fence would be replaced with a 8' fence and ideally a solar powered electric fence would be erected outside of the 8' fence. The existing fence has been severely damaged over the years by bears going over it. An 8' foot fence would significantly help with keeping bears out of the landfill and keep the bears from dragging garbage out of the landfill. An 8' fence would also help in securing/locking the landfill and better monitor what is being dumped there as a public safety measure. The useable portions of the existing 4' chain link fence would be used to fence the cemetery.
